SECURITY ADVISORY

**TO: AWWA Leadership
All Utilities**

FROM: Jack W. Hoffbuhr

DATE: August 17, 2004

Who:	EPA
What:	Fwd: New Information Posted on the Security Product Guide and Hard Copy Availability

The EPA Security Product Guide, a tool for drinking water and wastewater utilities to assist them in making informed decision about security-related products, has been updated to include eight (8) new and three (3) updated individual Product Guides. The Product Guide can be found at <http://www.epa.gov/safewater/security/guide/index.html>.

The new individual Product Guides include: Electronic Controllers, SCADA, Biometric Security Systems, Card Identification/Access Systems, Fence-Associated Intrusion Sensors, and Hatch Security.

The updated individual Product Guides include Fences, Manhole Locks, and Chemical Sensor - Total Organic Carbon Analyzer. These three revised individual Product Guides have been updated based on comments from the feedback page. Users can visit the website to provide additional feedback on the Product Guide website or on individual Product Guides.

This Security Product Guide is a work in progress and will be updated at regular intervals to ensure that the most recent information on security technologies is available. Users should check back frequently for the latest updates.

A hard copy of the Product Guide (EPA Document Number 817-B-04-001) has been created for those utilities that do not have access to the Internet. Call EPA's National Service Center for Environmental Publications at 1-800-490-9198 or 513-489-8190 to obtain a copy.
