**Entech Welcomes a “Tankie” for Business Development & Project Mgmt.**

Reading, PA – Entech Engineering, Inc. (Entech) has announced the addition of Christine Gunsallus, EIT, to their business development team. A frequent speaker at AWWA and municipal events throughout PA, NY, NJ, DE and MD, she will continue sharing her stories and experiences as a “tankie”, a moniker she earned at Fisher Tank Company where she learned all aspects of welded steel storage tank design, construction and repair.

Christine Gunsallus, EIT

Entech’s Principal, Bryon Killian, PE, said about Christine:

*“Christine’s tank construction and rehab experience expands and deepens our skillset in that market to help not only our Water and Wastewater customers, but also our Facilities and Industrial clients. She has a unique combination of technical know-how with the ability to share that through engaging and informative talks she’s given at Conferences, along with articles she’s written for newsletters and various publications. She is a definite asset to help our customers care for their infrastructure. Plus I hear she gives really good hugs.”*

Christine has over 20 years of experience in a variety of industries, including potable water, petroleum, and industrial. After earning a BS in Civil and Architectural Engineering from Drexel University, an MBA from Penn State, and building tanks for eleven years, she parlayed that knowledge into helping customers maintain their tanks at Tank Industry Consultants (TIC). For the past six years, she lead all sales and marketing efforts for Mumford-Bjorkman Associates (MBA), a tank and coatings consultant, in addition to serving as specification writer and project manager on dozens of tank rehabilitation projects along the east coast. She has served at the Chair for the SE PA AWWA Section, and coordinated the highly successful Tank Building Contest at the recent PA AWWA Conference in Hershey. In addition, she’s recruiting runners for the popular Tri-Con Fun Run (or walk!) in Ocean City, NJ on September 2nd.

**About Entech:**

Our engineering, consulting, and architectural teams help clients make more informed decisions as they invest in their facilities and infrastructure. From our 6 offices, we employ over 100 professionals who serve customers in the municipal, higher education, manufacturing, and natural gas markets.
