

Drinking Water Operator Exam Prep

Hypochlorite Disinfection Training

Presented by Pa. DEP and PA-AWWA

7 Contact Hours for Drinking Water Operators

Why take this training? : This workshop will prepare individuals for the Subclass 12-Non-Gaseous Chemical Disinfection (Hypochlorite exam). Based on DEP analysis, operators are failing the numerous dosage math questions on this exam. Topics to be cover include: hypochlorite disinfection, dosage and feed rates, chlorine demand and dose, mathematic principles and CT calculations.

The Hypochlorite Disinfection Module is a DEP-approved course under DEP's sponsorship with a complete workbook, instructor guide, and PowerPoint. The course is only available for classroom delivery at this time. Because of the complexity of dosage math, the course is approved for 7 hours.

The workshop will be split into two days so students will be able to practice work related math problems between the two sessions.

Who should attend? Operators and managers of community and non-transient non-community water systems (including consecutive systems) that use a chemical disinfectant or oxidant. ***Due to class size, we ask that each system initially registers no more than two individuals. If possible, a system should send one treatment plant and one distribution system representative responsible for decision-making in each of these areas.***

Time: Both days...Registration: 7:30am Course: 8am-12pm

Certified Operator Contact Hours: 7 (Drinking Water Operators only),

Fee: \$110 (includes comprehensive workbook, refreshments and operator contact hours!)
