

CAPITAL REGION.
WATER
JOB DESCRIPTION

Position Title: Supervisor Water Operations **Department:** Drinking Water

Definition

This position is responsible for the day-to-day and long-term optimization of the Capital Region Water (CRW) drinking water treatment process. This includes the Raw Water facilities of the DeHart Reservoir, and the Susquehanna River Pump Station, a 20 MGD computerized conventional mixed-media gravity filtration water treatment plant at the Water Services Center, and finished water pumping and storage facilities within the distribution system.

Qualifications and Requirements

- Bachelors. degree in a field related to water treatment; technical training or college coursework in engineering, chemistry, or environmental sciences is preferred. Or any equivalent combination of education, experience, and training which provides the required knowledge, skills and abilities.
- Ten (10) years of progressive experience in the water treatment industry.
- Five (5) years of supervisory experience.
- A valid Pennsylvania driver's license.
- Possession of a current Pennsylvania Department of Environmental Protection Waterworks Operator Class A certification, including Subclasses 1, 7, 8, 11. Certification through reciprocity must be obtained within 3 months of hire.
- Knowledge of best management practices, methods, procedures, and techniques for water treatment operation.
- Knowledge of computers and programs used in the operation of a water treatment plant and ability to learn software programs as needed for supporting departments, including Microsoft Office Suite.
- Thorough knowledge of occupational hazards and necessary safety precautions.
- Thorough knowledge of laboratory and analytical methods used in the analysis of drinking water.
- Experience in mechanical and electrical troubleshooting.
- Ability to organize, coordinate, train and supervise personnel to perform the functions of operating a water treatment plant.
- Writing / typing skills adequate to prepare clear, concise reports and communications.
- Knowledge of chemistry, environmental sciences, basic engineering concepts, and information technology related to water treatment facilities.
